

Young Woman Leading the Menstrual Health Drive

Learning about menstrual hygiene and its management is critical for the healthcare of the adolescent girls. BIPF conducts regular meetings to build awareness on this topic. This platform is a safe place for questions and answers on this socially difficult, but critical health-related issue. Laxmi Pradhan, a 21-year-old woman, from village: Kushachara Sahi, Jamunali, Angul has regularly participated in these programs. Through her learning, she now provides individual counselling to other adolescent girls in her area. She also leads the BIPF's initiative with ASHA.
